

ICC VB-6030

The ICC VB-6030 is a dynamic baler based on an innovative hydraulic concept, Black Star Technology. Stronger, faster and smarter to give you more value for the money! The VB-6030 has an extra generous infeed opening for large boxes up to 60" wide

BALEWEIGHT CARDBOARD

ICC VB-6030 benefits

MORE PRODUCTIVE USE OF TIME

Less time spent on waste handling, more time for your core activities!

MORE SPACE & ORDER

Our balers rapidly minimize the space the waste takes up, keeping aisles free and tidy.

LESS COST, MORE VALUE

More compaction = less waste to transport. Fewer transports requires results in lower transportation costs and reduced CO₂ emissions. Sorting at source yields a higher quality of waste material for recycling.

why VB-6030?

- + **Powerful compaction of large volumes of waste**
- + **Low-built design for easy transportation and rich placement opportunities**
- + **Intelligent features make you stay in control**

ICC VB-6030

VB-6030 IS OPTIMIZED FOR:

PAPER

- + Cardboard
- + Shredded Paper

PLASTIC FOIL

- + Shrink Film (LP)
- + Plastic Bags (LP)

Generous infeed for extra large packaging

STRONGER

BLACK STAR TECHNOLOGY

The innovative hydraulic concept, introduced by us as Black Star Technology, is based on the reverse technique of pulling instead of pushing the press-plate downwards when compacting material.

Advantages:

- The cylinders are at its strongest point when pressure peaks
- A long piston stroke

These factors contribute to powerful compaction and dense bales! **SOLID DESIGN** The VB-6030, with its light spherical design, the ISO 3834-certified welding of the chamber and the durable cylinder design, is created for a long heavy-duty service life.

SMARTER

INTELLIGENT BALER

The new PCB features data storage capacity, technical machine monitoring, communication opportunities and - as forerunner in the baler business - fulfills performance level D for personal safety.

SPECIAL PLASTIC MODE

Equipped with a special software for successful compaction of plastic foil. It gets activated when the baler is run in the manual LP mode and will keep the waste under pressure for 5 minutes to squeeze out more air from the bulky plastic.

FASTER

RAPID BALER KEEPS UP WITH YOUR PACE

- More throughput at less energy consumption than in traditional baling systems!
- Very short cycle time of only 24 seconds!
- Autostart and a sliding door that reopens automatically after each press cycle
- The gas spring-driven shutter goes up in less than 2 seconds!

MORE GREAT FEATURES

- Low-built design for easy transportation and successful installation where space is limited
- Silent operation
- User-friendly panel
- Material selector HP (cardboard) & LP (plastic)
- Bale indicator
- Bales can be secured by polyester straps or wire

DIMENSIONS & SPECS

*Transport Height **Transport feet add 3" but can be removed after unloading

DIMENSIONS
